

Bush Walk

We invite you to enjoy the thrill and adventure of a bush walk with our highly qualified and experienced guides. Following in the footsteps of the animals allows you the opportunity to learn more about the smaller creatures as well as the flora that make up this unique wildlife reserve in Southern Africa.

We recommend neutral coloured clothing, long trousers, closed walking shoes and a sun hat to ensure your comfort on walking safaris.

Children under the age of 16 years may not partake in bush walks due to safety reasons and adults over the age of 60 years require a medical fitness certificate in order to participate. These regulations are put in place to ensure your safety as this is our first priority given the nature of our environment.
